Subject: SF CIC Team weekly & upcoming meetings planned (the latter if for your fyi)

Hi Tony: Between moving and reconfiguring stuff back up it slipped. Please see the CIC Team weekly below. I think it is important for Pam/Carl to see what we are doing ... I know the OSC/RPMs are putting upcoming meetings in; however, there is quite a bit of coordination that the team does for these meetings.

Weekly 3/5/2014, SF CIC Team

-

Last Week

TAR CREEK – On February 25, 2014, EPA Region 6 and EPA Region 7 and the Kansas State Historical Society are meet with the Quapaw Tribe of Oklahoma to discuss comments to the Draft Cultural Heritage Study for the Quapaw Strip in Kansas and discuss the next steps and progress of the study. Discussions will also include Cherokee County Superfund Site Mine Waste Remediation-Tar Creek and Tributaries, Operable Unit 4 Treece Subsite being held with EPA Region 7. The meetings involve common stakeholders of EPA Region 6 Quapaw Tribe of Oklahoma and Oklahoma Department of Environmental Quality (ODEQ) and the State of Kansas. The intent of the report was to identify locations and specific activities relating to the Quapaw presence on the Treece strip which is now identified as the Quapaw Strip. All parties agreed that the report was lacking and needed to be further developed. Region 7 committed to hiring a new firm and approaching the development of the next report in phases and securing the Tribe's feedback and meeting with the Tribe throughout the development of the next document. The meeting concluded with all parties agreeing to work together.

On February 26, 2014, Representatives from EPA Region 6 and 7, the Kansas Department of Environmental Quality, Kansas Department of Agriculture, Division of Water Resources, Kansas Department of Wildlife, Parks and Tourism, Oklahoma Department of Environmental Quality, the U.S. Fish and Wildlife Service, the Quapaw Tribe of Oklahoma and the Region 7's Design Team contractor met at the Wildcat Glades Conservation and Audubon Center in Joplin, MO. This was an informational meeting on the future mine waste remediation efforts along the Kansas section of Tar Creek and its tributaries. This effort will be performed in 5 phases, with the first phase being funded with settlement funds from the PRPs. The Quapaw Tribe purchased the strip of land (approximately 100 acres for \$14,000) that was part of the Treece buyout, and tributaries identified in the designs cross over their land. Region 7 is looking for feedback on the power point presentation that was provided and any sampling approaches that could be useful. This OU addresses mine waste located just north of the Oklahoma border and west of Baxter Springs, KS, surrounding the town of Treece, KS. The OU also includes and addresses stream sediments for Lytle and Tar Creek from the northern boundary of the sub site in KS, south into Oklahoma to the confluence of Tar Creek." The discussions include keeping the tribal members informed of activities related to this effort. **(Janetta Coats x7308)**

AGRICULTURE STREET LANDFILL - Agricultural Street Landfill Superfund Site (Reuse Planning): EPA OSRTI is providing \$25,000 in funding for reuse planning efforts at Ag Street Landfill in New Orleans, LA. A tour of the site and kickoff meeting was conducted on February 18th. Participants included 6SF team members, the national Superfund Reuse contractor--who will be providing the technical assistance--, the LDEQ site project manager, and a representative from the City of New Orleans. Though the reuse planning effort is focused on the undeveloped property (OU1), efforts will be made to also coordinate with the Housing Authority of New Orleans, and the Recovery School District on the dilapidated structures on-site they are responsible for, that are an eye sore to the residents that reside in the community. The City is committed in pursuing redevelopment options for this particular area of the Site, despite the challenges of not having any funding. Efforts are being made to centralize the information about the site to the City of New Orleans. The previous information repository does not have any information due to the devastations occurred in the area by Katrina, Rita and Ike. Due to the continued sensitivity in the community, The City of New Orleans and EPA will coordinate efforts to get the local community involved. **(Janetta Coats x7308)**

LONGHORN ARMY - The US Army and AECOM is hosting the Quarterly Restoration Advisory Board (RAB) meeting to discuss the progress of environmental restoration activities and future cleanup plans with the Army's Cleanup Team and with representatives from the regulatory agencies – TCEQ and EPA Region 6. Information will be shared with the group about maps of well coordination for existing old and new wells at the site under AECOM contract. A site tour will be conducted with the RAB, community and TAG recipient.

Discussions may also include the ESD for LHAAP-18/24, boundaries for LHAAP-46 and 67 for stakeholder review and examination of retained soil cores, Installation Action Plan, Completed and Upcoming Field Work, The Ground Water Treatment Plant and the Dispute status with EPA. The information repository will also be discussed. **(Janetta Coats x7308)**

This Week

SAN JACINTO RIVER WASTE PITS The site team in coordination with Harris county and State agencies will host a Community Advisory Group (CAG) meeting on 3/12/14 at the Harris Pollution Control Services office. The site's proposed plan schedule and options will be discussed, the recent community meeting, and other Community Engagement issues to be discussed. **(D. Walters x6483)**

TASC, MEETING FACILITATION ECR contact D. Walters working with HQ on TASC services for several R6 sites this year, also the procurement of a Neutral Facilitator for an upcoming difficult public session for the Cavalcade sites. **(D. Walters x6483)**

ARKWOOD Revision and update of the CIP (Community Involvement Plan) is underway with contractor to meet the continued inquiry by a concerned citizen. **(D. Walters x6483)**

VERMICULITE PRODUCTS – A fact sheet was written and mailed out about the work beginning in March. **(Stephen Harper x2727)**
